

Christine Bové Bio

Christine Bové has been featured in magazines, local tv news and is a keynote speaker. Christine is an expert at helping clear clutter from your mind and your environment. She helps shift your energy using Feng Shui techniques for home, office, career, fashion and relationships. Her expertise for Fashion Feng Shui® has been showcased by top department stores and fashion lines. Christine Bové describes herself as a tour guide. Except this tour takes place in your personal space and empowers you to change your life! A certified Feng Shui practitioner, Christine reminds us that the Chinese Art of Placement is more than rearranging furniture; it's a transformation of oneself.

Christine's strong sense of determination began as a child. As she became a young adult, she still did not have a specific career in mind, but her sense of purpose was already deeply connected to helping others. Christine knew someday she would have her own business, one that was dedicated to helping people achieve their full potential.

A graduate of Iona College in 1998 with a BA in Speech Pathology, Christine began her career teaching children with mild to severe disabilities. She was up to the challenge and loved the children, but in her heart, she knew that she still had not found her true calling. Teaching would re-surface as the framework of her professional and personal life. She ventured into the corporate world to expand her horizons. Trusting her intuitions, she worried about how the non community-based environment was negatively affecting her co-workers. She received permission to create motivational programs designed to enhance creativity and morale. Programs included: monthly tips on decorating and maintaining positive

work environment, Fun Fridays, which encouraged interaction allowing employees to be recognized beyond their corporate roles, and Take a Book Leave a Book, a program that helped address and reduce clutter. Encouraged by the positive feedback and enthusiasm the programs received, and the discovery that she was actually practicing the art of Feng Shui, a career path became clear. With a little more research and some spiritual guidance, she found The Feng Shui Alliance and began her studies to become a certified Feng Shui Practitioner.

As soon as Christine was confident of her abilities as a new practitioner, she left the corporate world to focus full-time on Feng Shui. Along the way, she ventured into the retail world of home décor and home/office organization. A close observation of how consumers shopped for their homes, and what techniques retailers used for selling their products, gave her a new and deeper understanding of the scope of Feng Shui. She realized it could be used as a tool to help people learn healthy shopping habits and to understand what products would enhance their living spaces, thus gaining more control and insight into their lives. And, she has been able to help retailers more effectively reach consumers and educate their customers about shopping with the principles of Feng Shui. This knowledge, coupled with an in-home personal consultation has given Christine the magic formula to empower individuals.

Next, she took this insight to realtors and therapists! Christine is still on her journey, open and available to new ideas.
